

Policy

It is the policy of the Brattleboro Union High School District #6 to maintain an assessment system that continuously evaluates student learning and links curricular, professional development, and budgetary decisions directly to the need for increased student performance.

The goal of student assessment is to understand how students are performing in relation to local and state standards. Based on student assessment information, teachers, administrators and parents will work together to design and implement strategies to meet the needs of individual students as well as the District's overall goals for student achievement.

Implementation

The Superintendent, supported by the Office of Curriculum and Assessment, will develop a Comprehensive Assessment Plan. The Supervisory Union Board will annually review the Comprehensive Assessment Plan.

A component of the District's plan will be a schedule to assess performance regularly throughout the school year and from year to year. Assessments will measure student performance against standards outlined in the Vermont Framework of Standards and Learning Opportunities or comparable standards. The results of student assessments will guide schools in:

- making decisions about instruction, professional development, educational resources and curriculum; and
- reporting to the public on student performance measures and progress in the standards outlined by the Vermont Framework.

State Comprehensive Assessment System

The principals will oversee the administration of the assessment instruments included in the Vermont Comprehensive Assessment System. All students in the supervisory union will be assessed except for those students with a disability or limited English proficiency whose education plans exempt them. Students who are unable to participate in state assessments will be given an alternate assessment. The school will account for the assessment of 100% of its students.

Local Comprehensive Assessment System

The Superintendent, with the support of the Office of Curriculum and Assessment, will oversee the development and implementation of a local comprehensive assessment system that includes the state-level assessments, is aligned with the Vermont Framework as amended from time to time or comparable standards and is consistent with the current Vermont Comprehensive Assessment System. Students will be assessed in those standards associated with the Fields of Knowledge, the Vital Results, the arts, health and safety education, physical education, foreign language and applied learning. Local assessments may include a number of instruments and techniques such as standards-based, national norm referenced, local curriculum criterion-

referenced, portfolio assessment, exit interviews, senior projects and related supervisory union district assessment processes and systems.

The expectations and performance criteria of the system will be clear and be communicated to teachers, administrators, students, parents and other community members. The local system will employ a balance and variety of assessment strategies, both classroom-based and school-level assessments, in order to develop useful information on student achievement. The school will also provide students with the opportunity to evaluate their own work. The local assessment plan will be updated every three years and reviewed by the Supervisory Union Board annually.

School administrators and staff will use the assessment system to determine the answers to questions which include the following and will report to the Board annually in February:

- How are the students performing in relationship to local and state standards?
- Why are the students performing at the level they are?
- What could the school do differently in order to increase the number of students meeting or exceeding local and/or state standards?
- How can educators, parents and students monitor progress?

The Superintendent will oversee the development of a comprehensive computerized assessment database that includes all assessment results for each individual student, for each grade, for the school, and the District. This database will include information that tracks progress over time. Individual assessment information will be reported to parents in a format that outlines results and implications clearly. Parent-teacher communication about assessment results and implications will be encouraged.
